

Introduction:

Task given from *Solution Selling* is to build a sales board site. The goal of the website is to allow users to put up items for sale. These items will then be bought by other users through the website and *Solution Selling* earn a commission on each item sold.

Requirements:

- Login functionality
 - User needs to be able to register accounts and login.
- Roles
 - Accounts are either registered as Admin or User
- User functionality
 - Put up items for sale and edit or delete them.
 - View a report of customers
 - Edit profile information
 - Add and remove items to shopping cart
 - Checkout shopping cart
- Admin functionality
 - View sales statistics, commission earned and sales made
 - Moderate the store page by editing or deleting items
- Store page
 - Shows all items
 - If a user is logged in don't show their own items
 - Requires user to be logged in to purchase
 - Search functionality
 - View details of individual item

Set up:
